TIPS ON HOW TO DISPLAY VEGETABLES

Harvesting Tips

Try to harvest root crops when the soil is relatively dry. They should not be woody or overgrown. Tops should be trimmed to 2 inches above the crown. Long tops draw moisture from the roots and cause shriveling. Take care not to break the natural protective

skin or outer layer of the specimen. Stems should be left on all vegetables except tomatoes and muskmelons. The stem helps keep the vegetables from drying out.

Cleaning Tips

Dirt detracts from the appearance of vegetables but it is not advisable to wash all vegetables to clean them. Tender-skinned vegetables such as peas, beans, summer squash, peppers, tomatoes, and eggplant should be wiped clean with a soft cloth. If necessary to wash root crops, soak in cool water and gently wash with soft cloth; do not scrub. Leafy crops such as cabbage, lettuce, spinach and swiss chard can be washed carefully. A soft bristled brush can be used to clean cauliflower, kohlrabi, cucumbers and onions of any soil.

Preparing the Vegetable Specimen for Show

BEANS NAP: Harvest before seeds appear, when the seeds are about half grown. The ends of the pods should not be broken. The entire stem should be left on. Avoid showing blemished or wilted specimens.

BEETS, CARROTS, PARSNIPS, TURNIPS, RUTABAGAS: Tops should be trimmed off 1-1/2" to 2" above the crown. Trim side roots, Trim tap root of beet and turnip 1", carrots 1", parsnip 1/2" and rutabagas 1".

LIMA BEANS: Seeds should be full grown but still tender and before they have changed from green to white. Prepare like snap bean.

BROCCOLI: Heads should be dark green and compact. Avoid yellow flowers in head. Stems should be cut 5" - 6" from the top if the head.

CABBAGE: Select firm, compact heads. Stems should be cut 1/4" below the head. Leave 2 to 3 outside wrapper leaves.

CAULIFLOWER: Heads should be white, compact and not ricey. Stems should be cut to leave 4 to 6 leaves. Trim leaves to 1" - 2" above the white head.

SWEET CORN: Select ears well filled out to the tip. Kernels should be milky. Leave 2 banner leaves on husks. Trim silks to 1". Trim shank to 1".

CUCUMBERS: For pickling select fruit 3" - 5" long. For slicers Select fruits straight, dark green, 6"-10" long. Leave 1/4" stem.

EGGPLANT: Trim stems to 1-1/2" to 2". Calyx should be green. Avoid large fruits.

KOHLRABI: Ball should be 2" - 3" diameter with root removed just below the ball. Trim back leaves on upper one-third of ball to 4" - 6". Remove all other leaves.

MUSKMELON: Harvest fruits when they separate easily from the vine. Specimens should be free of spots and injuries.

ONIONS: Have specimens mature and cured. Do not peel - remove only outer scales that are broken or discolored. Trim roots for 1/2". Trim dried, twisted tops to 1"-2".

PEAS: Select bright green, well-filled pods. Do not wash the bloom. Leave stems as beans.

PEPPERS: Select specimens that are uniform in size, shape and color. Trim stems to 1/2" - 1". All specimens should have the same number of bottom lobes.

POTATOES: Tubers should be uniform in size and shape. Washing is permitted but do not scrub. Avoid defects or disease.

PUMPKIN: Specimens should be mature. Trim stems to 2". Wipe clean.

SUMMER SQUASH: Select small to medium fruit. Leave stem 1/2". Zucchini, straight-neck and crookneck should be 6" - 8" long. Round scallop type should be 2" - 3" diameter.
